

Country SA Services Directory

Five Steps to Sustainability

Step One: Enlist and keep your details updated

It is free to be listed on the Country SA Services Directory. Service providers are encouraged to update their details through the online update mechanism or respond to annual update emails.

Step Two: Help promote the directory

Put the Country SA Services Directory link on your organisation's advertising pages and use the regional email banner on your correspondence to link other services and clients.

Step Three: Promote website resources

There are a range of promotional items and resources available for service providers. These resources will empower the community to search for services to maintain their own health and wellbeing.

Step Four: Foster a sustainable environment

Induct staff on the use of the Country SA Services Directory and encourage regular access. Encourage other services to enlist on the directory and keep reminding local networks about the Regional Services Directory.

Step Five: Support continuous improvement

The Country SA Services Directory has a feedback link and all comments are considered for continuous improvement of the online Regional Services Directory.
